

Childhood Immunization Status (CIS)

Did you know?

Immunizations are essential for disease prevention and are a critical aspect of preventable care for children. Vaccination coverage must be maintained to prevent a resurgence of vaccine-preventable diseases. Physician recommendation is critical in promoting vaccine coverage.

Measure description

The percentage of children who have had the completed all of the following vaccines on or before their 2nd birthday:

- 4 diphtheria, tetanus, and acellular pertussis (DTaP)
- 2 influenza (Flu)
- 2 or 3 rotavirus (RV)
- 4 pneumococcal conjugate (PCV)
- 1 hepatitis A (HepA)
- 3 haemophilus influenza type B (HIB)
- 1 measles, mumps, and rubella (MMR)
- 3 hepatitis B (HepB)
- 1 varicella zoster (VZV)
- 3 polio (IPV)

Combination	DTaP	IPV	Hib	HepB	ZVZ	PCV	HepA	RV	Flu
Combination 3	✓	✓	✓	✓	✓	✓			
Combination 7	✓	✓	✓	✓	✓	✓	✓	✓	
Combination 10	✓	✓	✓	✓	✓	✓	✓	✓	✓

Key tips

- ✓ Preventative and Health maintenance summaries are acceptable for abstraction only if there is evidence that validates administration of the immunizations and not just when they are due.
- ✓ Schedule the next appointment while the patient is in the office. Call members and remind them about upcoming appointments.
- ✓ If newborn Hep B vaccination is administered, ensure it is coded in the child's record.
- ✓ Parent/caregiver reported vaccines are acceptable if documented in chart with vaccine name and administered date.
- ✓ A note, such as "up to date with all immunizations", that does not list the dates of all immunizations and the names of the immunization agents does not constitute sufficient evidence of immunization for HEDIS® reporting.

What do you need to do?

Submit claims (CPT, CPT II codes, etc.) and encounter data in a timely manner, including diagnosis codes.

Billing Codes*	
Description	Codes
DTaP Immunization	CPT: 90697, 90698, 90700, 90723
HiB Immunization	CPT: 90644, 90647, 90648, 90697, 90698, 90748
HepB Immunization One of the three can be the newborn hepatitis B vaccination.	CPT: 90697, 90723, 90740, 90744, 90747, 90748 HCPSC: G0010
IPV Immunization	CPT: 90697, 90698, 90723, 90713
MMR Immunization At least one MMR vaccination or at least one measles and rubella vaccination with at least one mumps vaccination.	CPT: 90707, 90710
PCV Immunization	CPT: 90670, 90671 HCPSC: G0009
VZV Immunization	CPT: 90710, 90716
Flu Immunization	CPT: 90655, 90657, 90661, 90673, 90674, 90685-90689, 90756 HCPSC: G0008
RV Immunization (2 dose series)	CPT: 90681
RV Immunization (3 dose series)	CPT: 90680
